Experiment - 5

Experiement on packet Capture tool: Wireshark

Aim:

To experiment on packet Capture tool

Wireshark:

Wireshark a network analysis tool namely known as ethereal capture packets in real time display them in human-readable format Wireshark includes, filter, color, coding. Other features that let you dig into network traffic, input individual packets.

→ Capture network traffic
→ Watch &smart &statistics
→ Define filters capture, display.

Capturing and Analysing packets using Wireshark tool.

To capture view packets in Wireshark tool capture tool packets from ethernet and can save it.

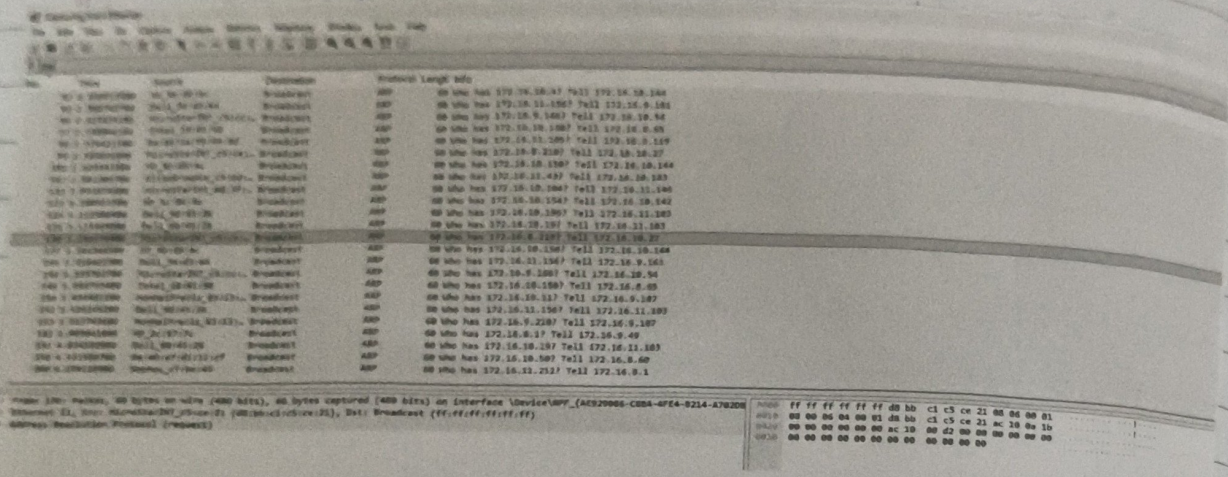

procedure:

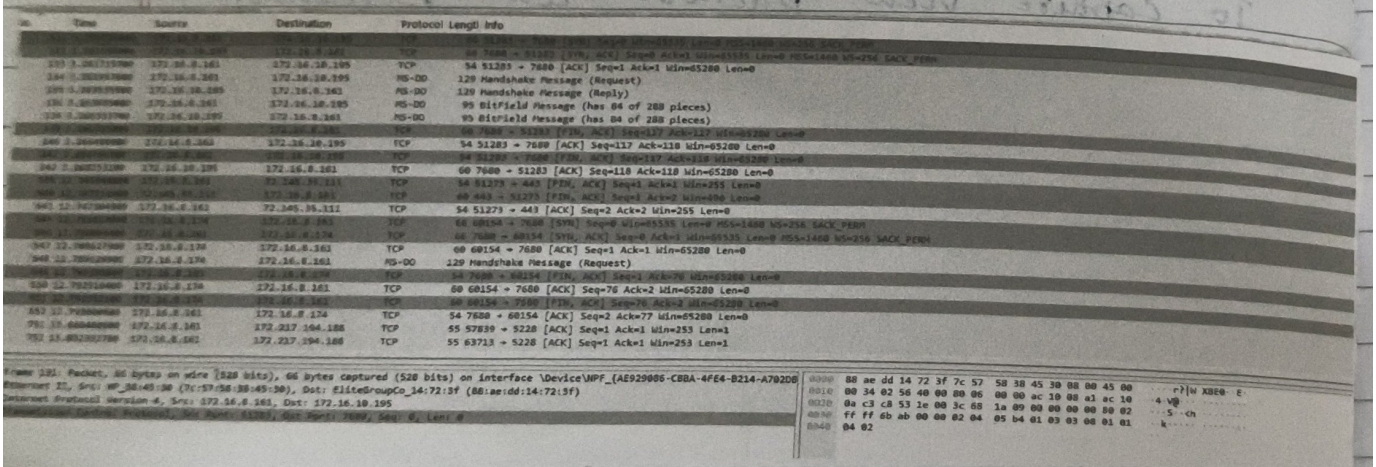

* Select local Area Connection in Wireshark
* Go to Capture option
* Select &top Capture automatically after 100 packets.
* Then click &start Capture.
* Save the packets.

procedure:

* Select LAN Connection in Wireshark.
* Go to Capture option.
* Select &top capture automatically

* Search TCP packets in search bar
* Now see flow graph click statistics
* Save the packets
  Create a filter to display ARP packets
* Now to capture option
* Select capture automatically after 100
* Then click start capture
* Search ARP packets in search bar
* Save the packets

Result:

Therefore expriment on packet capture Tool Using wireshark has been executed successfully.
