Exp 10 a

Aim:

Internetworking with routers in Cisco packet tracer Simulator & Design and Configure a simple internetworking Using a router.

In this network, a router and 2PCs are used Computers are Connected with routers Using a Copper Straight-through cable. After forming the network, to check network Connectivity a Simple PDU is transferred from PC0 to PC1

Procedure:

Step-1 (Configuring Router 1)

1. Select the router and open CLI
2. press Enter to start Configuring Router1
3. Type enable to activate the privileged mode.

Step-2 (Configuring PC's)

1. Assign IP Addresses to every PC in the network
2. Select the PC, Go to desktop & Select IP Configuration & assign an IP address.
3. Assign the default gateway of PC0 as 192.168.10.1

Step3 (Connecting PC's with Router):

1. Connect FastEthernet 0 port of PC0 with FastEthernet 0/0 port Router 1 using a Copper Straight-through cable.
2. Connect FastEthernet 0 port of PC1 with FastEthernet 0/1 port of Router 1 using Copper Straight-through cable.

Exp 10b

Aim: Design and configure an internetwork using Wireless router, DHCP Server & Internet cloud.

Procedure:

Part 1: Build a Simple Network in the Logical Topology Workspace.

Step 1: Launch Packet Tracer

Step 2: Build the topology

a. Add network devices to the workspace.

b. Change display names of network devices

c. Add physical cabling between devices on the workspace.

Part 2: Configure the wireless router.

a Create the wireless network on wireless router

b. Click on the Save Settings tab.

Step 2: Configure the Laptop

a. Configure the Laptop to access the wireless network

Step 3: Configure the PC

a. Configure the PC for the wired network.

Step 4: Configure Internet cloud. NO 0/P

Step 5: Configure the Cisco.com Server.

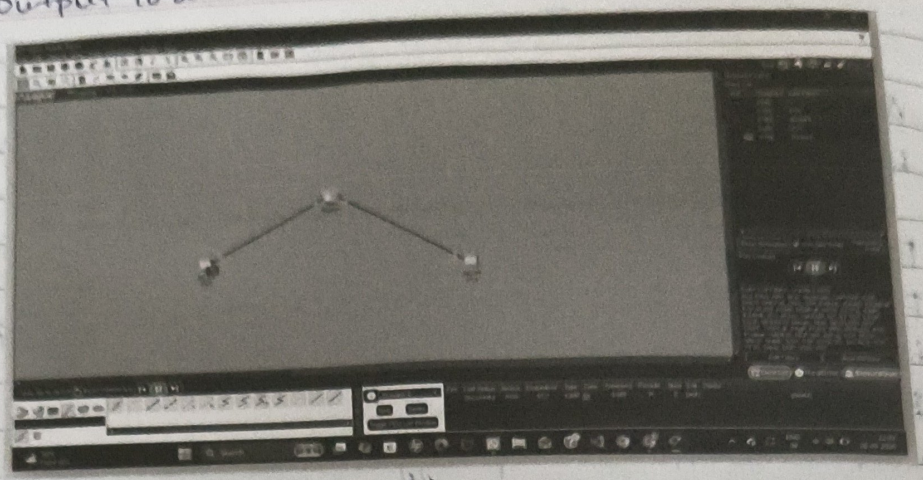

part 3: Verify Connectivity

Step 1: Refresh the IPV4 settings on the PC

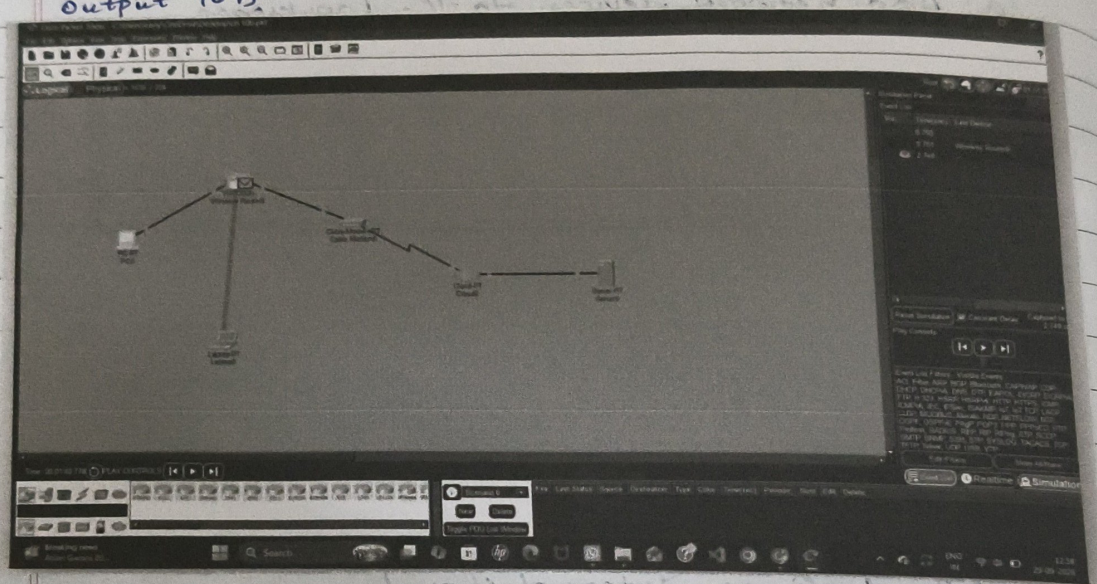

a) Verify that the PC is receiving IPV4 configuration information from DHCP.

b) Test Connectivity to the Cisco.com Server from the PC

Output 10 a

Output 10 b.

Result:

Therefore internetworking Using routers & internetworking Using wireless router & DHCP Server & internet Cloud has been executed Successfully.
